

Uni-Mix® Integral Concrete Color

Many things can affect the appearance of color. For best color matching results, a representative job site sample should be cast using materials from the project location.

Colors shown on this chart represent formulations using medium gray cement and sealed with solvent based Clear Guard® Cure and Seal. Variations can be expected due to differences in cement, aggregates and method of application.

 U10 Sonoran Tan	 U11 Autumn Oak	 U26 Lanon Stone	 U20 Smoke
 U21 Sandstone	 U12 Sunset Beige	 U13 Millstone	 U31 Weathered Terra Cotta
 U22 Salt Marsh Gray	 U23 Dusty Rose	 U35 Shadow Slate	 U51 Clary Sage
 U24 Georgia Clay	 U15 Coral Buff	 U16 Harvest Wheat	 U37 Sienna
 U27 Mocha Brown	 U25 Santa Fe Buff	 U33 Hampshire Red	 U34 Brick Red
 U14 Pewter	 U18 Gull Gray	 U28 Charcoal	 U49 Deep Charcoal

The Butterfield Color Advantage

Color is an integral part of what we see every day. From the subtle earth tones of sand, wheat, and sage, to the bright colors of a sunset or mountain range, combinations of colors can be used to set the mood and theme. Color decisions are made with two factors in mind – specific design needs and how well the color will endure year after year.

Color and durability are the very essence of Butterfield Color. With over 40 years of field experience in architectural colored concrete, we offer a line of concrete color additives that are technically superior and meet the needs of the architectural specifier as well as the concrete finisher.

FOR PROFESSIONAL USE ONLY

Read all applicable and current product information for your project: Technical Data Sheet (TDS), Color Chart, Installation Guide, Material Safety Data Sheet (MSDS).

MasterFormat™ Guide Specifications, and Butterfield Color® Architectural CAD Details and Hatch Patterns are available for the specifier/designer. All information is available online at:

www.butterfieldcolor.com.

Description: Uni-Mix® Integral Concrete Colorant is a pre-measured admixture for integrally coloring ready mixed concrete during batching. Conforming to ASTM Standard C979 (Standard Specification for Pigments for Integrally Colored Concrete), it is a blend of non-fading, synthetic iron oxides and a water-reducer, which produce uniform, streak-free colors in concrete. The water-reducer in Uni-Mix® Integral Concrete Colorant allows the color to quickly and evenly disperse without additional water, thereby maintaining the strength and freeze/thaw resistance of the cured concrete. This same component improves the finishing characteristics of the concrete, which contributes to color uniformity and surface durability. Superior quality control during manufacturing and packaging help to ensure your jobs will have uniform color from load-to-load.

Uni-Mix® Integral Concrete Colorant is suitable for all concrete flat work installations, interior floors and exterior hardscapes, as well as, precast, tilt-up and cast-in-place applications. For truly unique and creative concrete installations, use of Uni-Mix® Integral Concrete Colorant can be used with other Butterfield Color products: Perma-Cast® Shake-on Color Hardener, Perma-Cast® Sierra Stain™, Elements™ Transparent Concrete Stain, Butterfield Color® Stamping Tools, Perma-Cast® Antiquing Release and Butterfield Color® Clear Liquid Release.

Uni-Mix® Integral Concrete Colorant and Uni-Mix® Liquid Integral Concrete Colorant colors can also be produced as a Perma-Cast® Shake-on Color Hardener. The shake-on colors produced from integral colors may slightly vary from the color chart.

Packaging: Uni-Mix® Integral Concrete Colorant is pre-packaged in 24 standard colors to eliminate weighing and measuring errors. Add one bag for each cubic yard (meter) of concrete. Do not open bags. Simply toss the dissolving bag into the mixer. This eliminates the mess and inaccuracy associated with the han-

dling of loose colorants. The use of single dose bags also simplifies inventory management.

Uni-Mix® Integral Concrete Colorant is packaged for 5-sacks or 6-sacks of cement per cubic yard. It can also be custom packaged for any cement content or metric mix design. The color chart approximates the color of cured and sealed concrete designed with a medium gray Portland cement. Local materials, finishing techniques, texture, and method of curing and sealing will affect the final color. Custom color requests are welcome at Butterfield Color. Designing theme colors and precise color matching are available upon request with ample lead time.

Quality Control: Cast a job site sample at least 21 days prior to the installation for approval of color and finish. Utilize all materials, tools, and techniques from the actual job in the mock-up. Consistent batching, pouring, finishing, curing, sealing, and preparation techniques, will ensure the uniformity of architectural concrete. Verify adequate wet and dry slip resistance. Verify maintenance requirements. Site visits by Butterfield Color, Inc. Personnel are for making technical recommendations only and not for supervising or providing quality control.
