

SureCrete's SureBroom is a commercial grade concrete overlay designed to resurface the concrete with a coating that delivers a cementitious slip resistant texture. SureBroom is a self bonding, single component, dry polymer technology that boosts a 6,000+ compressive strength PSI. It's high polymer content, special aggregate sizes ensures the strongest bond to properly prepared concrete surfaces. SureBroom has been applied internationally in areas such as: parking garages, theme parks, water parks, retail centers, college walking paths, warehouses, and high traffic retail centers.

### **Florida Parking Garage, USA**

**Sq Ft: 98,000**

The 3rd story of a parking garage in Florida was causing issues with the owners of the property. The completed level had a uneven and **poorly finished concrete** surface. Their desire was to have a **new broom finish** applied to the existing floor.

### **Rohoni Amusement Park, India**

**Sq Ft: 550,000**

The theme park was in need of a coating that could stand up to the heavy, consistent traffic patterns of their theme park. SureBroom was used with integral color to create the patterns and themes.

### **Las Vegas Parking Garage, Planet Hollywood Casino**

**Sq Ft: 250,000**

The concrete finishing was weathered and damaged from vehicle traffic. SureBroom was used to resurface and bring the concrete up to their standards.
